## **Water Service Interruption**

On Sunday July 7, there was a pump malfunction at the Exit 1 pump station. In order to ensure reliable water service, the pump and a faulty valve must be replaced. Replacement of the pump will result in a water service interruption which could last up to 3 hours.

The pump replacement is scheduled for Friday July 12. Water service will be discontinued at 10:00 am. Restoration of water service will be as soon as possible and is not expected to tank more than 3 hours.

Upon restoration of service, temporary air pockets or slight discoloration may be noticed in the water. Please contact us if the discoloration persists.

Any questions or concerns, contact Dan Tyler, Superintendent of Utilities at [dtyler@brattleboro.org](mailto:dtyler@brattleboro.org) or call 802-254-4255
